

ApexPlanet Internship

Task 5: Capstone Integration & Portfolio Finalization

TASK - 5TimeLine : 08 Days

Capstone Integration & Portfolio Finalization

Objective:

- To consolidate all work into a professional portfolio, demonstrating a complete and masterful end-to-end project.

Steps:

- 1. Master Portfolio Creation :**
 - Create a master GitHub Repository named [YourName]-DataAnalyst-Internship-Portfolio.
 - This should be a polished, single point of reference. Structure it with:
 - A high-quality README.md that serves as a project homepage, with an overview of the entire internship.
 - Links to each of the four previous part-specific repositories.
 - A final, refined version of your presentation deck.
 - A summary of key learnings and technical skills demonstrated.
 - (Optional but highly recommended): Create a simple personal website using GitHub Pages to host this portfolio in a more visual format.
- 2. Final Review & Professional Reflection :**
 - Review all your repositories and videos for consistency, professionalism, and clarity.
 - Draft a LinkedIn post summarizing your internship experience, the skills you've built, and linking to your master portfolio.

Deliverables:

- GitHub: Master portfolio with all project links
- LinkedIn Video: 3-5 min portfolio walkthrough and learning reflections

Prepared for: Kamani Kumari

B.Tech Computer Science & Engineering | Bangalore Technology Institute

Project Overview

The objective of Task 5 is to combine all internship work into one professional GitHub Portfolio, publish it using GitHub Pages, upload your final presentation, and share a LinkedIn reflection. This creates one complete portfolio that recruiters can view.

Final Deliverables

Deliverable	Purpose
GitHub Master Repository	Contains all internship work
README.md	Acts as your portfolio homepage
Final Presentation	Shows your complete internship work
GitHub Pages Website	Creates a free portfolio website
LinkedIn Post	Professional internship reflection
3-5 Minute Video	Portfolio walkthrough

Step 1: Create the Master Repository

Repository name: KamaniKumari-DataAnalyst-Internship-Portfolio. Select Public and create a README. This becomes your main portfolio repository.

Step 2: Organize Your Portfolio

Create folders named assets and presentation. Upload README.md, index.html, and your Final_Presentation.pdf. Keep screenshots inside assets.

Step 3: Write a Professional README

The README should contain About, Internship Tasks, Skills, Portfolio Website, and Thank You sections. It should look like a project homepage.

Step 4: Enable GitHub Pages

Go to Repository → Settings → Pages → Main Branch → Save. GitHub creates a free website after a few minutes.

Step 5: Upload Final Presentation

Upload your final PPT or PDF using Add File → Upload Files → Commit Changes.

Step 6: Publish LinkedIn Post

Share what you learned: Data Cleaning, EDA, Dashboarding, Data Storytelling, Statistical Validation, Python, Pandas, SQL, and GitHub.

Professional README Layout
